FOCUS
Urinary Incontinence and
Bladder Health

HOSPITAL
Acibadem Kayseri Hospital

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

A central part of Dr. Dolanbay's practice is the evaluation and management of urinary incontinence and other bladder health concerns in women. Assessment typically begins with a detailed history of symptoms and their effect on daily life, followed by a clinical examination and, where appropriate, further testing, so that conservative, medical or surgical options can be discussed on an individual basis.

In gynecologic oncology, Dr. Dolanbay is involved in the care of women with cervical cancer, ovarian cancer and endometrial cancer. He performs hysterectomy when it is indicated for benign or malignant disease, and the decision for surgery is made after reviewing the patient's findings and discussing the alternatives.

Menstrual irregularities

INTERNATIONAL PATIENTS

Dr. Dolanbay consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
