Radiology

CLINICAL FOCUS

Dr. Yıldız's areas of expertise are computed tomography, virtual angiography, multidetector CT colonography, virtual colonoscopy and magnetic resonance imaging. Computed tomography and magnetic resonance imaging are cross-sectional imaging methods used to evaluate a wide range of conditions, and the choice between them depends on the...

In practice, this work involves selecting an appropriate imaging protocol, reviewing the acquired images and preparing a report that supports the referring physician's decision-making. Information on related imaging services, such as coronary CT angiography and PET-CT imaging, is available on this site.
