Cardiology Department

CLINICAL FOCUS

Dr. Karakaş evaluates and manages a range of cardiovascular conditions. His areas of expertise include coronary artery disease, atherosclerosis, angina and myocardial infarction, as well as heart failure, myocarditis, heart valve disease and rheumatic heart disease. He also sees patients with arrhythmias and hypertension.

On the procedural side, his work includes angiography, percutaneous coronary intervention and pacemaker therapy. The choice of diagnostic tests and treatment depends on each patient's history, symptoms and existing findings, and is discussed with the patient after a clinical assessment.
