Acibadem International Hospital, İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Kinci's clinical work covers both obstetrics and gynecology. In obstetrics, he provides pregnancy monitoring and delivery, including epidural delivery, cesarean delivery and water birth, and he assesses and manages pregnancy-related conditions such as preeclampsia and ectopic pregnancy.

A further focus of his practice is menopause and sexual dysfunction treatment. For these concerns, Dr. Kinci carries out an assessment of symptoms and history and discusses the available options with the patient, taking into account her overall health and individual circumstances. Treatment decisions are made on a case-by-case basis after clinical evaluation.

Pelvic pain and functional disorders

Infertility

HPV

Preeclampsia

Pregnancy monitoring and delivery

INTERNATIONAL PATIENTS

Dr. Kinci consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound or MRI reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Pelvic organ prolapse

Infertility

HPV

Preeclampsia

Ectopic pregnancy

Sexually transmitted diseases
