DEPARTMENT
Pediatrics

CLINICAL FOCUS

Dr. Kuşku's areas of expertise are pediatric care, child health and adolescent health. His work covers the general medical care of infants and children as well as the health concerns that arise during adolescence, a period in which physical and developmental changes call for an age-appropriate approach.

Care for a child or adolescent typically begins with an understanding of the patient's history, current symptoms and any previous evaluations or treatments. Where earlier reports or test results exist, these are reviewed as part of the assessment so that any further steps can be considered in context. Dr.

INTERNATIONAL PATIENTS

Dr. Kuşku consults in Turkish and English, and interpreters can be arranged for families who speak other languages. For international families, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, X-ray, MRI or CT reports, laboratory results and discharge summaries, arranges appointments and organizes the hospital visit.
