CLINICAL FOCUS

Dr. Meriç's clinical work centers on diagnostic endoscopy, including gastroscopy, which is used to examine the esophagus, stomach and upper small intestine. Within the field of liver disease, he assesses and manages patients with hepatitis and other hepatic conditions, and he also evaluates pancreatic diseases.

His areas of expertise further include inflammatory bowel disease, comprising Crohn's disease and ulcerative colitis, as well as coeliac disease and diverticulitis. Dr. Meriç also sees patients with common upper gastrointestinal complaints such as dyspepsia and gastritis.
