Rehabilitation

CLINICAL FOCUS

Mehmet Sabah Ateş works with patients who need rehabilitation for pain, reduced mobility or loss of everyday function. Pain rehabilitation aims to help patients manage pain while gradually restoring movement and activity, with the plan adjusted to the individual's tolerance and progress.

A physiotherapy assessment is usually the starting point. It typically includes a review of the patient's history, current complaints and previous treatment, together with an examination of posture, range of motion, strength and functional movement.

INTERNATIONAL PATIENTS

Mehmet Sabah Ateş speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
