İstanbul

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

A large part of Dr. Söylemez's practice is pediatric orthopedics. He assesses and treats children with clubfoot (pes equinovarus), flatfoot (pes planus) and other foot and ankle conditions, and he performs spasticity surgery for children with pediatric spasticity. He also carries out limb lengthening and deformity correction surgery.

In adults, his work includes foot and ankle surgery, the management of sports injuries and knee and joint injuries, and knee replacement surgery. Non-surgical and surgical options are considered on a case-by-case basis, and the expected course of treatment and recovery is discussed with the patient before any decision is made.
