Acibadem Kayseri Hospital

DEPARTMENT

Plastic, Reconstructive & Aesthetic Surgery

CLINICAL FOCUS

Dr. Severcan's surgical work centers on aesthetic procedures of the face and breast. He performs rhinoplasty for patients seeking changes to the shape or proportions of the nose. In breast surgery, he offers breast augmentation and breast reduction surgery, and he assesses a range of breast conditions to determine whether a surgical or non-surgical approach is appropriate.

A second area of his practice is cosmetic dermatology, a subspecialty that includes non-surgical treatments for the skin and hair. Dr. Severcan performs botulinum toxin injections and dermal fillers, as well as mesotherapy, including facial mesotherapy and hair mesotherapy. These treatments may be considered on their own or alongside surgical procedures, depending on the patient's concerns and goals.

INTERNATIONAL PATIENTS

Dr. Severcan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound or other imaging reports, laboratory and pathology results, operative notes and discharge summaries from any previous procedures, and...
