CLINICAL FOCUS

Endocrinology addresses conditions in which the glands that produce hormones function abnormally, and the resulting symptoms can be varied and slow to develop. Dr. Yilmaz evaluates hormone-related conditions across the range of endocrine disorders, working from the patient's history, physical findings and laboratory results to reach a diagnosis before treatment is considered.

Metabolic diseases form the second part of his practice. This area includes disturbances in how the body processes glucose, lipids and other nutrients; the related pages on diabetes mellitus treatment and metabolic syndrome treatment describe the general approach at the hospital. In each case, Dr.

INTERNATIONAL PATIENTS

Dr. Yilmaz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit, so that relevant records are available when the patient arrives.
