Radiation Oncology

CLINICAL FOCUS

Dr. Abacioğlu's clinical work centers on radiotherapy for cancer. His areas of expertise include brain tumors, head and neck cancers, breast cancer and gastrointestinal oncology. In addition to external beam radiotherapy, he works with brachytherapy, in which a radiation source is placed close to or within the treated tissue.

His published work reflects a particular interest in neuro-oncology. Topics include a dosimetric analysis of radiation-induced hypothyroidism in patients who received radiotherapy to the neck, a treatment planning comparison of RapidArc radiosurgery and GammaKnife for benign brain lesions, whole brain reirradiation in patients with...
