CLINICAL FOCUS

Spine health is a central part of Mehmet Yakupçebioğlu's clinical work. He sees patients with neck disc herniation and lumbar disc herniation, as well as postural and alignment changes of the spine such as loss of cervical lordosis and lumbar hypolordosis.

He also works with patients who have sports injuries and knee injuries, and with soft-tissue and pain-related conditions including piriformis syndrome, myalgia, fibromyalgia, and frozen shoulder syndrome. For these conditions, the rehabilitation approach is generally directed at reducing discomfort, restoring range of motion, and supporting a gradual return to normal activity.

INTERNATIONAL PATIENTS

Mehmet Yakupçebioğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes...
