Neurosurgery

FOCUS
Spina bifida · Rhizotomy

HOSPITAL
Acibadem Altunizade Hospital, İstanbul

DEPARTMENT
Neurosurgery

CLINICAL FOCUS

A large part of Dr. Yıldız's practice involves the evaluation of low back, neck and back pain and the conditions that commonly underlie it, including disc herniation and spinal canal stenosis. Because many spinal conditions can be managed both conservatively and surgically, he reviews existing imaging and previous treatments before recommending a course of action.

Dr. Yıldız additionally cares for patients with spina bifida and tethered cord syndrome, and performs rhizotomy where this is indicated. For selected patients with chronic pain that has not responded adequately to other treatments, he offers spinal cord stimulation.

Spina bifida Rhizotomy Spinal and spinal cord injuries
Spinal injections Spinal fusion surgery

INTERNATIONAL PATIENTS

Dr. Yıldız consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT or X-ray reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...

CONDITIONS TREATED

Spina bifida Spinal and spinal cord injuries
Low back, neck and back pain Disc herniation Spinal canal stenosis
Spinal and spinal cord tumors
