DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Yener's practice covers the preventive, restorative and urgent dental needs of children. Preventive care includes fluoride application and fissure sealants, which are used to help protect teeth at risk of decay, and space maintainers, which are used to preserve space for developing permanent teeth after a primary tooth is lost early.

A further part of her work concerns dental root infection and disease of the dental pulp. She performs root canal treatment on primary teeth as well as on permanent teeth, and she manages dental trauma, including injuries to the teeth of children.
