Metabolism

CLINICAL FOCUS

A large part of Dr. Çakır's clinical work concerns the thyroid gland. She evaluates and manages thyroid disorders including hyperthyroidism, Graves' disease, Hashimoto's disease, thyroid nodules and thyroid cancer.

Dr. Çakır also treats pituitary disorders and pituitary tumors. She has co-authored reviews on somatostatin receptor biology in neuroendocrine and pituitary tumors and on molecular pathways in pituitary tumorigenesis, as well as a study of radiotherapy-induced hypopituitarism in nasopharyngeal carcinoma.
