DEPARTMENT
Neurosurgery

CLINICAL FOCUS

The core of Dr. Bozkurt's practice is the surgical management of brain tumors and spinal cord tumors. His clinical interests include meningiomas, gliomas, and deep-seated brain tumors, as well as brain metastasis surgery for patients whose cancer has spread to the brain.

In pediatric neurosurgery, Dr. Bozkurt evaluates and treats children with brain tumors and other neurosurgical conditions, working with the pediatric teams involved in the child's care. His neurovascular work covers brain hemorrhage and brain aneurysms, where the timing and choice of treatment depend on the individual findings.

Brain and spinal cord tumors
