Ophthalmology

CLINICAL FOCUS

Dr. Gezer evaluates and treats several common and chronic eye conditions. Her areas of expertise include glaucoma, a group of conditions in which raised pressure inside the eye or other factors may damage the optic nerve and, if not monitored, can affect vision over time.

In addition, her practice includes cataract, in which the natural lens of the eye becomes cloudy, as well as conditions affecting the eyelids. These include blepharitis, an inflammation of the eyelid margins, and ptosis, a drooping of the upper eyelid.
