Gynecology & Obstetrics

CLINICAL FOCUS

A significant part of Dr. Mutlu's practice is devoted to urogynecology and pelvic floor conditions. He evaluates and treats pelvic organ prolapse, pelvic pain and functional disorders, and performs vaginal tightening procedures. He also manages endometriosis, a condition that may cause chronic pelvic pain and menstrual complaints and that often requires a combination of medical and, where appropriate, surgical management.

In gynecologic surgery, Dr. Mutlu performs hysterectomy and uses vNOTES scarless surgery, a vaginal natural-orifice approach that avoids abdominal incisions in suitable cases. His further areas of expertise include menstrual irregularities, ectopic pregnancy, Bartholin cyst and genital warts. In obstetrics, he provides pregnancy follow-up and attends childbirth, supporting patients from early pregnancy through delivery.

Menopause

vNOTES scarless surgery

Vaginal tightening

Pelvic organ prolapse

Pelvic pain and functional disorders

INTERNATIONAL PATIENTS

Dr. Mutlu consults in Turkish and English, and interpreters can be arranged for other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit.
