Hospital, Muğla

DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

The core of Dr. Ağartioğlu's clinical work is restorative dental treatment. This area of dentistry is concerned with restoring the form and function of teeth that have been affected by damage or disease, while aiming to keep as much of the natural tooth as possible.

Alongside restorative procedures, Dr. Ağartioğlu places emphasis on oral health in a broader sense. This includes assessing the general state of the teeth and gums, identifying factors that may affect the long-term outcome of any restoration, and advising patients on how to support their dental health after treatment.

INTERNATIONAL PATIENTS

Dr. Ağartioğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, previous treatment records and any relevant laboratory results, and arranges appointments and the practical aspects of the...
