Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Köse assesses and treats a range of gynecological conditions. His areas of expertise include menopause, urogynecology, pelvic pain and functional disorders, uterine prolapse and HPV. He also provides endometriosis treatment, with the approach chosen according to the individual patient's findings and symptoms.

On the surgical side, his work includes robotic surgery, vNOTES scarless surgery and vaginal laparoscopy. Whether a surgical or non-surgical option is appropriate depends on the diagnosis, the patient's history and the results of clinical evaluation, and these considerations are discussed with the patient before any decision is made.
