Reanimation

CLINICAL FOCUS

Dr. Sevimli's work covers the areas that fall within anesthesiology and reanimation. In intensive care treatment, this involves the close monitoring and support of critically ill patients whose vital functions need continuous observation and, where necessary, organ support.

Pain management is another part of his practice. Approaches to pain differ according to its cause, its duration, and the patient's overall health, and a suitable option can only be identified after an individual assessment. Related information is available on this site's page on Interventional Pain Management. Dr.

INTERNATIONAL PATIENTS

Dr. Sevimli consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
