CLINICAL FOCUS

The Emergency Service is the point of entry for patients whose condition requires prompt medical attention. Dr. Fattal's clinical focus is on emergency care in this setting. This begins with emergency triage, the structured process of assessing how urgently each arriving patient needs to be seen, so that those with the most time-sensitive needs are evaluated first.

Where indicated, Dr. Fattal provides initial treatment aimed at addressing the immediate problem and patient stabilization, meaning measures intended to support the patient's condition while a diagnosis is clarified and the next steps are arranged. Depending on the findings, care may then be continued within the hospital by the relevant specialty, or the patient may be discharged with advice on follow-up.

INTERNATIONAL PATIENTS

Dr. Fattal communicates with patients in Turkish and English, and interpreters can be arranged for patients who speak other languages. For international patients, the Acibadem international patient team coordinates the collection of prior medical records, including imaging reports such as MRI, CT, X-ray or ultrasound, laboratory and pathology results, operative notes and discharge...
