CLINICAL FOCUS

Dr. Benhabib evaluates and treats a range of gynecological conditions, including polycystic ovary syndrome, endometriosis, menstrual pain and irregularities, pelvic pain and functional disorders, and vaginismus. He also sees patients with HPV and sexually transmitted diseases.

Menopause is a central part of his practice, reflected in his membership of two menopause societies and in his published work on peri- and postmenopausal bleeding. He provides pregnancy follow-up and childbirth care, with delivery options including epidural, cesarean section and water birth.
