Pediatric Surgery

CLINICAL FOCUS

Dr. Çevik's clinical work centers on pediatric surgery, with a particular focus on the digestive system. Her areas of expertise include Hirschsprung disease, pediatric digestive system surgery, and pediatric appendicitis. She also treats abdominal wall conditions in children, including pediatric hernia and umbilical hernia.

A further part of her practice involves conditions of the genital and inguinal region in children. These include undescended testicle, hypospadias, hydrocele, spermatic cord cyst, and labial adhesions. She also performs circumcision.
