HOSPITAL

Acibadem Kayseri Hospital

DEPARTMENT

Pulmonology

CLINICAL FOCUS

A substantial part of Dr. Apaydin's practice concerns the evaluation of lung and thoracic cancers, lung nodules and mesothelioma. Lung nodules are often found incidentally on imaging, and his role is to review the existing scans, weigh the likelihood of a benign or malignant cause, and advise on whether observation with follow-up imaging or further investigation is appropriate.

Dr. Apaydin also manages a range of chronic and acute airway and lung diseases. These include asthma and chronic obstructive pulmonary disease (COPD), where the aim is to confirm the diagnosis, review current medication and reduce the frequency of symptoms and flare-ups.

- Lung and Thoracic Cancers
- Lung Nodules
- Mesothelioma
- Lower Respiratory Tract Infections
- Bronchitis

INTERNATIONAL PATIENTS

Dr. Apaydin consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as CT, X-ray or MRI reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

- Lung infection
- Lung abscess
- Lung nodules
- Mesothelioma
- Bronchitis
- Pneumonia
