CLINICAL FOCUS

Dr. Atahan's practice is focused on surgical oncology, with particular attention to diseases of the breast. He evaluates and treats patients with breast cancer, including the less common male breast cancer, and performs mastectomy when this is the appropriate surgical option.

Beyond oncology, he sees patients with benign breast conditions such as breast cysts, mastitis and breast pain, and he supports breast screening and the assessment of breast diseases more broadly. His areas of expertise also include breast augmentation surgery.

Surgical oncology Breast cancer Male breast cancer
Mastectomy Breast reconstruction

CONDITIONS TREATED
