CLINICAL FOCUS

Dr. Saylık evaluates and treats knee injuries such as meniscus tears and cruciate ligament tears, and performs hip and knee replacement surgery, including robotic-assisted approaches where appropriate. In the field of orthopedic oncology, his work covers the assessment and surgical management of bone tumors.

His practice also includes foot and ankle surgery for conditions such as flatfoot, clubfoot and diabetic and Charcot foot, as well as shoulder and elbow surgery and pediatric hand and upper extremity surgery. Treatment decisions are made after a review of each patient's history, imaging and previous treatments.
