CLINICAL FOCUS

A large part of Dr. Sezer's practice concerns chronic and acute airway conditions. He evaluates and manages asthma, with attention to symptom control and the review of existing treatment plans. He also treats lower respiratory tract infections, including bronchitis and pneumonia, and assesses patients with a broad range of lung diseases whose symptoms may include cough, shortness of breath, or abnormal findings on imaging.

Dr. Sezer's clinical interests also include lung cancer and other thoracic cancers, as well as the assessment of lung nodules identified on chest imaging. Depending on the clinical picture, this may involve a review of prior scans, follow-up imaging, or bronchoscopy to obtain further diagnostic information. He additionally evaluates and manages patients with pulmonary embolism.

Pulmonary embolism

INTERNATIONAL PATIENTS

Dr. Sezer consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example CT, X-ray, or MRI reports, laboratory and pathology results, operative notes, and discharge summaries, and arranges appointments and the hospital...
