Hospital, İstanbul

DEPARTMENT
Organ Transplantation

CLINICAL FOCUS

Dr. Yıldar's clinical work centers on surgical conditions of the liver, pancreas and biliary tract. He evaluates and treats patients with liver diseases, pancreatic diseases and biliary tract diseases, including cholecystitis.

His practice also covers endocrine surgery, including thyroid surgery, as well as general surgical conditions such as inguinal hernia and anorectal conditions. His background in organ transplantation, including a kidney transplantation fellowship and the establishment of a transplantation center, informs his approach to complex liver and...
