Rehabilitation

CLINICAL FOCUS

A large part of Dr. Yıldırım's practice involves the spine. He assesses and manages patients with neck and lower-back disc herniation, facet joint syndrome and piriformis syndrome, and he uses manual therapy as one component of a rehabilitation plan where it is considered appropriate.

Beyond spine and pain care, his areas of expertise include neuromuscular disorders, lymphedema treatment and pediatric rehabilitation. In each case, the emphasis is on a physician-led assessment of the underlying problem, followed by an individualized rehabilitation program.
