CLINICAL FOCUS

Dr. Yilmaz's listed areas of expertise cover a range of inflammatory, infectious, and immune-mediated skin conditions. These include Behçet's disease, a systemic inflammatory disorder that can involve the skin and mucous membranes; bullous pemphigoid, an autoimmune blistering disease; and herpes zoster infection.

Further listed conditions are tinea mammae, a fungal infection of the skin of the breast, and burning mouth syndrome, a condition affecting the oral mucosa. Several of these topics are reflected in his publications, which include a case report on velopharyngeal insufficiency in a patient with Behçet's disease, a paper discussing the...
