CLINICAL FOCUS

Dr. Tüzüenalp evaluates and manages a range of eye conditions in adults and children. Her areas of expertise include glaucoma, refractive errors such as astigmatism and hyperopia, and cataract care including the use of premium intraocular lenses. She also sees patients with blepharitis, eye allergy, ptosis, and eyelid twitching, as well as keratoconus and uveitis.

Drawing on her background in strabismus and pediatric ophthalmology, she assesses children with pediatric eye diseases, amblyopia, and color blindness. Within neuro-ophthalmology, her work includes the evaluation of eye migraine and other visual symptoms that may have a neurological component. Each patient's condition is assessed individually, with attention to symptoms, visual function, and appropriate follow-up.
