Ophthalmology

CLINICAL FOCUS

A large part of Dr. Akbaba's practice concerns the eyelids and the tissues around the eye. She assesses and treats stye, blepharitis and ptosis, as well as eyelid and orbital tumours. She also sees patients with thyroid eye disease, in which the eyelids, orbital tissues and eye movements may be affected, and patients with dry eye or...

Dr. Akbaba also cares for children with paediatric eye diseases, including congenital eyelid and tear duct problems. In addition, she evaluates refractive errors such as myopia, hyperopia and astigmatism, and allergic eye disease.
