CLINICAL FOCUS

Dr. Aydemir's clinical work covers the two closely connected fields of anesthesiology and reanimation. On the anesthesia side, this includes anesthesia planning and perioperative support for patients undergoing surgical or interventional procedures, with attention to comfort and clinical safety before, during and after the procedure.

His practice also includes palliative care, which is directed at patients living with complex and serious health conditions. In this context, the emphasis is on supportive care aimed at relieving symptoms and maintaining comfort, alongside or after other treatments. The specific approach in each case depends on the patient's diagnosis, overall condition and the treatment plan agreed with the wider clinical team, and Dr.

INTERNATIONAL PATIENTS

Dr. Aydemir consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
