DEPARTMENT
Pediatrics

CLINICAL FOCUS

A significant part of Dr. Seven's practice involves the care of newborns. This includes newborn follow-up in the first weeks of life, newborn screening tests and the treatment of newborn jaundice. He also provides well-child follow-up for older infants and children, monitoring growth and development at regular intervals and evaluating growth disorders in children when they are identified.

Dr. Seven evaluates and manages common symptoms of infancy, such as infant colic and gas pain in infants, which are frequent reasons for parents to seek pediatric advice. He also treats childhood infectious diseases and upper respiratory tract infections in children, which are among the most common reasons for a pediatric visit.

Pediatric nutritional disorders

Childhood infectious diseases

Growth disorders in children

Upper respiratory tract infections in children

INTERNATIONAL PATIENTS

Dr. Seven consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory results, ultrasound reports, discharge summaries and notes on previous treatments, and arranges appointments and the hospital visit.
