DEPARTMENT
Ophthalmology

CLINICAL FOCUS

Dr. Demir's practice covers common and complex eye concerns. He assesses and treats glaucoma, a condition in which pressure inside the eye can damage the optic nerve, and macular degeneration and other retinal diseases that affect the back of the eye and central vision. Cataract, in which the natural lens of the eye becomes cloudy, is also among his areas of expertise, as is eyelid drooping.

Children and their families are also part of Dr. Demir's practice. He manages paediatric eye conditions and strabismus, a misalignment of the eyes that may be identified in childhood or later in life. He also evaluates and treats conjunctivitis, an inflammation of the surface of the eye that has a number of possible causes and may require different management depending on the underlying reason.

Strabismus

INTERNATIONAL PATIENTS

Dr. Demir speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as previous eye examination findings, imaging reports, laboratory results, operative notes and discharge summaries, and arranges appointments and the hospital...
