DEPARTMENT
Emergency Service

CLINICAL FOCUS

The Emergency Service is the point of entry for patients with sudden or urgent medical problems. Dr. Demirel's role is to assess these patients on arrival, to establish the likely cause of their symptoms as far as this is possible in the emergency setting, and to begin appropriate care.

Because the range of presentations in an emergency setting is broad, the emphasis is on careful, step-by-step evaluation rather than on a single procedure or condition. Dr. Demirel's approach is to prioritize the patient's immediate clinical needs, to communicate findings in plain terms, and to make sure that the transition to any subsequent care is coordinated.

INTERNATIONAL PATIENTS

Dr. Demirel speaks Turkish and English, and interpreters can be arranged for patients who prefer another language. The Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit, so that relevant information is available before the patient is seen.
