CLINICAL FOCUS

His clinical work centers on child and adolescent health and on well-child follow-up, in which growth, development, and general health are monitored over time. He diagnoses and treats pediatric infectious diseases, including upper respiratory tract infections and croup, and evaluates children with respiratory symptoms.

Dr. Göğebakan also sees infants and children with digestive and feeding concerns. This includes the evaluation and management of infant colic and pediatric constipation, as well as the monitoring of pediatric nutritional disorders, where a child's intake, growth, and nutritional status are reviewed at regular intervals.

Child and Adolescent Health Pediatric Constipation
