CLINICAL FOCUS

A central part of Dr. Hurmuzlı's work is abdominal radiology, which involves imaging of the organs and structures of the abdomen. Within this area he performs abdominal ultrasound, an examination that uses sound waves rather than ionizing radiation and is often used as a first step in evaluating abdominal symptoms or findings.

Dr. Hurmuzlı also works with magnetic resonance imaging, a cross-sectional technique that provides detailed images of soft tissues and can help clarify findings seen on ultrasound or other studies. His interest in oncological radiology involves imaging of patients with known or suspected tumors, including the assessment of new findings and the comparison of current images with earlier examinations during follow-up.

INTERNATIONAL PATIENTS

Dr. Hurmuzlı speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
