CLINICAL FOCUS

Dr. Lenk's clinical work centers on structural, functional and rhythm-related heart conditions in children. He assesses and follows patients with congenital heart disease, including atrial septal defect, and with heart valve disorders.

Diagnostic procedures within his practice include cardiac catheterization and echocardiography. He performs fetal echocardiography for prenatal cardiac diagnosis, an ultrasound examination of the unborn baby's heart that may be considered when a routine pregnancy scan raises a question about cardiac structure or rhythm, or when there are...
