DEPARTMENT
Physical Medicine & Rehabilitation

CLINICAL FOCUS

The core of Mustafa Özcan's work is rehabilitation: helping patients regain mobility, strength and everyday function after injury, surgery or illness, or in the presence of a longer-term condition. In a rehabilitation setting, care usually begins with an assessment of the patient's current physical status and goals, after which an individual program is planned and adjusted over time as the patient's condition changes.

Within this framework, Mustafa Özcan provides physical therapy and recovery care. Physical therapy typically involves supervised therapeutic exercise, manual techniques and guidance on movement and posture, with the aim of reducing pain, improving joint range of motion and restoring function.

INTERNATIONAL PATIENTS

Mustafa Özcan communicates with patients in Turkish and English, and interpreters can be arranged for other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and organises the...
