CLINICAL FOCUS

Dr. Vurucu's areas of expertise include trauma care, insect stings, tick bites, drowning emergencies, acute hypoxia, airway obstruction and environmental emergencies. Trauma care covers patients who have sustained injuries from falls, accidents or other mechanisms.

Environmental emergencies form a notable part of his practice. These include drowning incidents, in which the rapid assessment of breathing and oxygenation is central, as well as insect stings and tick bites, which may require observation for local or systemic reactions and, in the case of tick bites, careful removal and follow-up advice.

Acute Hypoxia

INTERNATIONAL PATIENTS

Dr. Vurucu speaks Turkish and English. For international patients, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organizes the hospital visit. Patients who come from abroad often bring records in different formats, and having these available in advance helps the team prepare the visit.
