CLINICAL FOCUS

Dr. Sofikerim's clinical work covers male reproductive health, erectile dysfunction, the diagnosis and treatment of prostate diseases, and kidney stones. In urologic oncology he evaluates and treats patients with prostate cancer, kidney cancer, bladder cancer and testicular cancer.

His published work includes studies on laparoscopic heminephrectomy for benign and malignant diseases of the horseshoe kidney, type 2 diabetes mellitus as a possible predicting factor for incontinence after laparoscopic radical prostatectomy, hormonal predictors of prostate cancer, and tubeless percutaneous nephrolithotomy with...
