DEPARTMENT
Gastroenterology

CLINICAL FOCUS

A central part of Dr. Süveran's practice is endoscopy, including colonoscopy and gastroscopy, which are used both to investigate symptoms of the digestive tract and, where appropriate, to carry out treatment during the same procedure. His endoscopic work also includes ERCP, a procedure that combines endoscopy and imaging to examine the bile ducts and pancreatic duct, and balloon dilation, which may be considered for narrowed...

Dr. Süveran sees patients with inflammatory bowel disease, including Crohn's disease and ulcerative colitis, conditions that typically require long-term follow-up and periodic reassessment. He also manages celiac disease and Barrett's esophagus, a change in the lining of the esophagus that is usually monitored with endoscopy.

INTERNATIONAL PATIENTS

Dr. Süveran consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as endoscopy and pathology reports, laboratory results, MRI, CT or ultrasound reports, operative notes and discharge summaries, and arranges appointments...
