CLINICAL FOCUS

Dr. Yücel's specialty is pediatric surgery, the field of medicine concerned with the surgical assessment and treatment of infants, children and adolescents. Children differ from adults in anatomy, physiology and the way they respond to illness and treatment, and surgical care in this age group is planned with these differences in mind.

Parents and caregivers are an essential part of this process. A pediatric surgery consultation with Dr. Yücel typically involves reviewing the child's medical history and the concerns that led to the referral, examining the child, and discussing the possible options with the family.

INTERNATIONAL PATIENTS

Dr. Yücel speaks Turkish and English, and interpreters can be arranged for families who speak other languages. For families travelling from abroad, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organises the hospital visit.
