CLINICAL FOCUS

A large part of Dr. Zungur's work concerns coronary artery disease and its underlying process, atherosclerosis. He evaluates patients with angina and those who have had a myocardial infarction, and he performs angiography to assess the coronary arteries. The choice of investigation and treatment depends on the individual patient's symptoms, risk factors and existing findings.

He also cares for patients with heart valve disease, including aortic valve stenosis, and with heart failure and hypertension. Arrhythmias and pacemakers are a further area of his practice; this includes assessing heart rhythm disorders and the follow-up of patients who have, or may need, a pacemaker.

Pacemakers Heart Valve Disease Heart Failure Hypertension Arrhythmias

INTERNATIONAL PATIENTS

Dr. Zungur consults in Turkish and English, and interpreters can be arranged for other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as electrocardiogram, echocardiography, CT or MRI reports, laboratory results, angiography or operative notes and discharge summaries, and arranges appointments and the...
