DEPARTMENT
Otorhinolaryngology (ENT)

CLINICAL FOCUS

A large part of Dr. Duran's work concerns the nose and sinuses. He evaluates and treats nasal deviation and performs septoplasty and septorhinoplasty, in which the nasal septum and the external shape of the nose are addressed in the same operation.

In the throat and airway, his areas of expertise include tonsillectomy, adenoid surgery and the evaluation of dysphagia, or difficulty swallowing. He sees patients with hearing loss and dizziness, both of which require careful history-taking and examination to identify the likely origin.
