CLINICAL FOCUS

A central part of Dr. Metintaş's practice is the evaluation of mesothelioma, lung cancer and other thoracic cancers. This includes the assessment of lung nodules found on imaging, where the aim is to clarify whether a finding needs further investigation, follow-up over time or treatment. Bronchoscopy is among the procedures he performs;

He also manages chronic and acute respiratory diseases, including asthma, chronic obstructive pulmonary disease (COPD), pulmonary fibrosis and other forms of pulmonary disease, as well as pulmonary hypertension and pulmonary embolism. Lower respiratory tract infections such as bronchitis and pneumonia are a further area of his work.

INTERNATIONAL PATIENTS

Dr. Metintaş consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as CT, X-ray, MRI or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
