Radiology

CLINICAL FOCUS

Dr. Çizmeli's clinical work centers on interventional neuroradiology and interventional radiology, in which procedures are carried out under imaging guidance through small access points rather than open surgery.

In interventional radiology, his areas of expertise include transarterial radioembolization (TARE), a catheter-based treatment delivered through the arteries under imaging guidance. His published work also includes preoperative embolization of a mediastinal paraganglioma, ultrasound-guided aspiration and irrigation of breast abscesses,...
