Acibadem International Hospital, İstanbul

DEPARTMENT  
Gynecology & Obstetrics

## CLINICAL FOCUS

Dr. İdil evaluates and treats a range of gynecological conditions. In the field of endometriosis treatment, she sees patients with endometriosis and ovarian endometrioma, including those whose main complaint is menstrual pain. She also assesses women with urinary incontinence and other bladder health concerns.

Surgical care in her practice includes hysterectomy, cesarean delivery and genital aesthetic procedures. In addition, she manages HPV-related conditions, including genital warts, other sexually transmitted diseases, Bartholin cysts, and the symptoms and health changes associated with menopause.

HPV Hysterectomy Genital Aesthetics Menstrual Pain

Bartholin Cyst
